McCANN VALLEY

- Digital Advertising Office

This is the first social application of its kind that deals with the "loneliness among the elderly" Phenomenon. It enables high-quality contacts through technology-based telephone calls that create ideal connections between users...based on availability and shared interests.

About us

In 2016, we established our first business-social venture Desert 19 in Mitzpeh Ramon, which provides remote administration services. We established it with love for the magical town of Mitzpeh Ramon, which suffered from a high unemployment rate. We saw that it was good. To Desert 19, came hardworking, dedicated employees, who care about their clients and wake up every morning enthusiastically, to provide excellent service. So, we continued!

At Hana's initiative, we decided to establish more employment centers in the geographic periphery, in order to allow more and more women to join the labor market, under fair and dignified conditions, standards of excellence and ambition.

Spring Valley was founded in Emek Hamaayanot, which provides digital solutions, 360... And Lev/Heart 19 in Zefat, which provides Accounting and Financial services. Together we enjoy the flat world and we provide our customers with all the solutions from one synergetic, professional and caring home.

Our social principles:

- Quality and respectable employment
- Professional training in leading and required fields
- Sharing profits with our employees
- Encouraging the local economy wherever we operate

And why women?

Because gender equality burns within us and the Supersonas project was established for this purpose, promoting women at all levels of influence towards gender equality.

The 19 projects are constantly growing and are not going to stop here! For any additional ideas, cooperation and opportunities, write to us: hanar@supersona.com
